Questions

Write SQL queries for the following questions, submit the queries with the results obtained.

1. List the dates of orders placed by customer Mr Gray (try using a subquery).

2. List the names of the supplier, itemID, item description and stocklevel for each kind of tent.

3. Who supplies the two types of item on order 119 (i.e, itemID, supplierName)?

4. List items for which there is more than one type on sale (e.g., tents)and say how many types there are.

5. List customers with ordered items yet to be received and the description of the item they are waiting for (i.e., firstname, familyname, description).

6. For orders that have not been completely fulfilled, what is their orderID, which itemIDs on those orders have not been despatched and how many of those items remain to be despatched?

7. Write an interesting query of your own and explain what question it is answering. Submit the query and results.
